with Metricon.

Australia's no.1
home builder

In 2018 Metricon was once again named Australia's largest home builder. That's now 3 years in a row we have achieved this prestigious award. Being the largest doesn't mean we forget about where we came from. Over the last 40 plus years Metricon has built a reputation for providing great value homes of a high construction standard coupled with personalised customer service. Even today this is true to our core and something we strive to improve on every year.

building homes for over 40 years

We have been building homes for over 40 years. Over this time, we have learnt a lot about building homes and the people who buy them. Lots has changed in this time including the size, design, construction methodology, lot sizes and creature comforts that are now standard in most of our home designs. What hasn't changed is the way we build our homes and the commitment we make to quality by only using the best materials and tradespeople available.

lifetime structural guarantee

Every MetInvest by Metricon home now comes with a Lifetime Structural Guarantee.* For as long as you own the home it will be covered under our guarantee. That's well above the industry standard and the legal requirement of 7 years under the Domestic Building Contracts Act (Vic).

Why? Because we are confident in the quality materials we use and skilled tradespeople we trust to build our homes. Just another layer of comfort and peace of mind for owners when choosing MetInvest by Metricon for their next property.

*For more information on our Lifetime Structural Guarantee, visit www.metricon.com.au/terms-conditions

a quality investment

Over time we have developed an enviable record for building a high volume of homes to a very discerning standard. This can only be achieved by implementing and controlling a quality assurance process across all aspects of the new home building journey. Over time we have refined this process to now become an industry leading quality assurance program that involves internal checks and balances across all facets of the build to deliver the quality homes we are renowned for. This process entails a large number of quality checks over 6 distinct stages of the building process.

This is managed by our team of dedicated building professionals, ensuring our quality controls and standards are met at all stages of the build process.
